About the location of the site

Address of the construction site	FORTH VALLEY ROYAL HOSPITAL, STIRLING ROAD, LARBERT, SCOTLAND, FK5 4WR
In which local authority is the site address?	Falkirk Unitary Authority

About the project

Description of project	Painting and Decorating: Painting & decorating, Refurbishment: Refurbishment commercial
Description of the construction work	Project Overview This Scope of Works covers the refurbishment of Ward 3 Mental Health Unit to enhance patient safety through reduced-ligature and ligature-safe / anti-barricade measures, while maintaining high standards of hygiene, infection prevention and regulatory compliance. The works are aligned with NHS Scotland mental health environment guidance, SHFN 30 / HAI SCRIBE requirements (Stage 2 completed at design, Stage 3 prior to commencement), CDM Regulations 2015, relevant Scottish Health Technical Memoranda (SHTMs), and the Health and Safety at Work etc. Act 1974. Responsibilities NHS Forth Valley will specify all functional and safety critical reduced ligature elements, including doors, windows and wardrobes. Serco, as Hard FM Contractor, will specify and deliver the remaining internal refurbishment works, coordinate specialist installations, manage site activities, implement infection control measures, and provide supporting trades. Programme & Operational Approach The programme duration is approximately 15 weeks, delivered in phased works (typically three rooms per week) to minimise clinical disruption. Access will be controlled and coordinated with ward staff, with no full ward closure planned. Patient and staff safety will be managed through phased HAI SCRIBE risk assessments and contingency arrangements. Fortnightly progress meetings will be held, and all waste managed via lockable, lidded skips.
No of people on site	5
No of contractors on site	3
Start Date	11/05/2026
Time Allowed by Client (in weeks)	24
Duration (in weeks)	15
